MEMO TO: LAMP Participants
FROM: The Honorable John M. Schroder, Sr.
Louisiana State Treasurer
LAMP, Inc. President
RE: Update on LAMP Cyber Security

Considering the recent cyber-attacks at several school boards in Louisiana and throughout the United States I wanted to assure you that the security of your account information at LAMP is one of our top priorities.

We visited with each service provider that LAMP employs and reviewed their internal cyber-security policies. The assessments included the following:

- Each service provider has a comprehensive plan to avoid disruptions caused by cyber-attacks.
- They each have completed a full test of their cyber threat prevention program in the last 12 months with no significant issues.
- Each company currently identifies and continuously evaluates both internal and external vulnerabilities and threats on an on-going basis.

I recognize that LAMP succeeds because it is a cooperative effort. As such, your input as a participant is key to LAMP's continued growth and success. Please contact me, our board members or the LAMP administrative office at 1-800-249-5267 if you have any comments, suggestions or concerns. We always value hearing from our participants.
