Wake Me Up When September's (FOMC Meeting) Ends

Wake Me All eyes are on the Fed as investors wait to see whether the U.S. central bank will cut interest rates in September after years of elevated rates. Inflation cooled again in July, and market participants are now convinced that we will see a rate cut next month. Core prices, which exclude food and energy, rose 3.2% from a year earlier and 0.2% from the month prior while overall CPI rose 2.9% year-over-year, marking the first time CPI has been below 3% since 2021. Shelter costs, like rents, continue to be the main driver of prices and accounted for 70% of the total increase in core prices during the year. Despite the increase in housing costs, prices across the rest of the categories were quite stable and declines in vehicle prices helped offset some of the sting from shelter costs.

The Fed operates on a dual mandate to keep prices stable and to maximize employment and now that prices are nearing the Fed's target, the cooling labor market is beginning to enter the picture. Unemployment in July rose to 4.3% compared to 3.5% a year prior. Healthcare continues to show strong employment, but we are starting to see declines in professional services employment and some areas of manufacturing which all point to a cooling labor market. We are now in an environment where inflation has continued to moderate for several months against the backdrop of increasing unemployment which will likely provide the Fed with the backing they need to begin cutting.

Whether the Fed can cut rates while staving off a recession or a resurgence in inflation remains to be seen. From the perspective of the overall economy, however, things appear strong. Q2 GDP growth surprised to the upside at 2.8% and was driven by elevated consumer spending and a large jump in business investment. The ISM manufacturing index, while in contractionary territory, is still at a level that suggests a growing economy, and the services index bounced back to expansion in July. Overall, conditions appear to be coalescing in favor of a rate cut and investors will be eagerly watching next month's meeting.

Treasury Yields

MATURITY	8/13/24	7/12/24	CHANGE
3 Month	5.177%	5.332%	-0.155%
6 Month	4.924%	5.179%	-0.255%
