Welcome to the Tablet Ready MYACCESS

It's hard to believe that in a mere four years, the tablet computer has become a significant fixture of our daily lives.

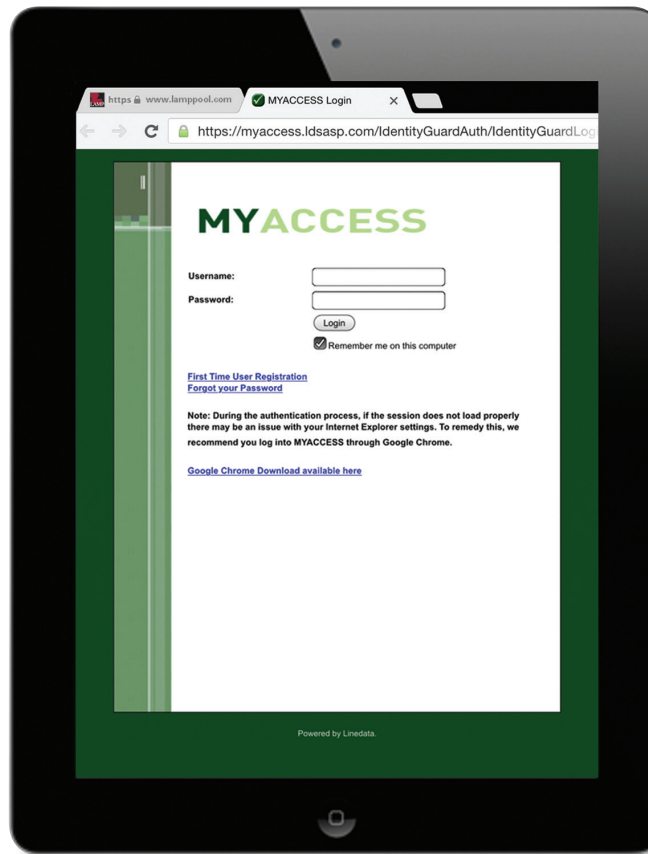

According to the Pew Research Internet Project, Mobile Technology Fact Sheet, as of January 2014, approximately 42% of American adults own a tablet computer. And by some reports, desktop PC sales dropped by 98% in 2013.*

What does that mean for you?

Well, while we know local governments have not abandoned their desktop PCs, it's also true that over the past couple years our local government clients are increasingly BYOD (bring your own device), arriving at meetings with a tablet in tow.

LAMP believes you should have ready access to your account information. With that in mind, we have untethered you from your PC, giving you a tablet friendly version of MYACCESS, with command over your account

information at all times. So whether you are being asked a question in a council meeting, or checking to see if a wire transfer arrived after getting home late during an audit, you will always get what you need for peace of mind when you have MYACCESS.

The functionality of MYACCESS remains the same on a tablet, but here is some important information you should know to improve your experience:

- Supported operating systems: iOS (iPad), Android (Nexus, Galaxy, Nook, Kindle) and Windows 8 (Surface).
- Browser compatibility: Chrome, Firefox and Safari.
- Sign-on from www.lamppool.com using your current credentials.

For more information about MYACCESS, or for general assistance with your account, please contact LAMP Client Services at 1-800-272-8162 or lamppool@publictrustadvisors.com.

The **ECONOMY**

Shockwaves from the Far East

For the past few weeks, the world's financial markets have experienced heightened turbulence stemming from concerns over the strength of the global economy. China is the world's second largest economy, and its economic data has been trending negatively for quite some time. Compounding these concerns, the recent collapse of its stock market coupled with the government's intention to devalue the Yuan have sent up more than a few red flags. This has had a spillover effect into emerging market economies as well, which are dependent on China as a strong trading partner.

Unfortunately, the U.S. markets have not been immune. The major stock indexes were down over 6 percent for August, finishing with their worst monthly losses since May 2012. Fundamentally, the domestic economic data remains solid. Strong consumer confidence and continued growth in the labor market should help maintain the economy's momentum after growing at 3.7 percent in the second quarter. It's possible that this is just a long-overdue correction in the stock market after years of capital appreciation.

As for the outlook for the Federal Reserve (Fed), this may delay action until market volatility subsides. Recent comments from the Fed would indicate some hesitance to raising rates in the face of such turbulence. However, with the U.S. economy proving resilient and mounting concerns over the prolonged use of a zero interest rate policy, the Fed may just decide that it's time to get on with it. Without the ability to lower rates any further, the Fed has precious few tools to combat the next economic downturn. With this in mind, the markets are still pricing the Fed to hike rates before the end of the year.
