

Monthly Economic Update

June 2015

Home Sales Mixed, Initial Jobless Claims Rise Slightly

Existing home sales increased 6.1 percent in March following a 1.2 percent increase in February and exceeding analyst estimates of 3.1 percent. The annualized rate of existing home sales is now 5.19 million. On the contrary, new home sales decreased by 11.4 percent in March after growing 7.8 percent in February. The spring is often the busiest time of the year for home sales, however the contradictory home sale reports provide uncertainty as to the strength of the housing market. Initial jobless claims increased from 294,000 to 295,000 for the week ending April 18. Although new jobless claims increased, they remain below 300,000, a sign that the employment situation is still a point of strength for the American economy.
